## WORK EXPERIENCE

---

### REBCA Solutions Inc.

April 2019 - February 2020

Software Developer - Vancouver, BC

- Effectively collaborated in an agile software team to develop and launch new real estate software solutions.
- Recommended software architecture, UX, and software development process solutions to boost company success.
- Coordinated efforts among front-end developers to ensure codebase maintainability and project productivity.

### Fishtank Consulting

August 2018 - April 2019

Web Developer - Calgary, AB

- Revitalized legacy codebase for a medical consultations web application written in Golang and AngularJS.
- Discovered and patched critical security vulnerabilities and bugs in the codebase.
- Massively accelerated time to build and deploy the application by automating the process using CD/CI tools.

### Finger Food Studios

September 2017 - December 2017

Quality Assurance Intern - Port Coquitlam, BC

- Performed manual testing of desktop and mobile applications.
- Created and updated documentation to streamline test procedures and summarize test results.
- Accurately documented mobile application defects and application tutorials using JIRA.

## PROJECTS

---

### Intranet as a Service Application

- Architected and programmed a web application that provides a cloud-based intranet solution for organizations.
- Used the Google Cloud Platform for database, storage, authentication/authorization, and serverless functions.
- Implemented solution to separate data, content, and users from dynamically generated spaces accessed by subdomain.

### Group Expense Sharing Application

- Designed and developed a web application that lets a group of users track and split their shared expenses.
- Engineered a secure and fast authentication flow that keeps users signed in indefinitely.
- Created and incorporated a modern UX/UI that effectively utilizes screen real estate.

## EDUCATION

---

### University of Victoria

September 2013 - April 2018

Bachelor of Software Engineering
